

COMPANY PROFILE

WEATHERBLAZER INDIA PVT. LTD.

WHO WE ARE

As the name suggests, WEATHERBLAZER India Pvt Ltd is an innovative idea converted into reality and a professionally managed company in the field of weatherproofing and speciality waterproofing solutions for the constructions industry. Our solutions help in protecting every possible substrate in the construction industry from the ill effects of weather. We are a one of a kind company in India, for the last decade, to provide end to end solutions for pre and post construction stages. We work closely with Architects, PMCs, Structural Engineers, Construction companies and help them in enhancing the life of their buildings and add value to it.

The techniques widely used by companies some years back for waterproofing have proven to be faulty, leading to numerous challenges. These included inadequate materials, lack of technology, and limited durability. Weatherblazer revolutionized the industry by introducing a wide range of maintenance-free waterproofing & weatherproofing solutions that not only offered cost-effectiveness but also came with specific warranties. Moreover Weatherblazer is in the process of transitioning the unorganized waterproofing sector into a structured and organized industry with end to end solutions including products and applications. This has propelled the company to a leading position in the waterproofing industry.

We have a full-fledged infrastructure with teams spread in more than 15 cities in 5 states at the end of 2023 and have a goal to reach 50 cities in FY24-25. We also have well trained & managed operations, a devoted team of young and enthusiastic professionals, experienced top management, and trained staff with a friendly work environment to nurture the professional development, which believes in teamwork & is always adaptable to new ideas.

VISION

To be the leading solutions provider in India by offering the best of weatherproofing services and not only being financially profitable, but extremely rewarding in all the other positive results we create for the customers, stake holders and employees.

MISSION

To deliver unparalleled weatherproofing solutions in India, setting the industry standard for exceptional quality and reliability with relentless innovation, superior service delivery, and fostering a culture of integrity, trust, empowerment, and environmental responsibility. By enriching lives through durable, sustainable solutions, we aim to not only achieve financial success but also create lasting positive impacts for our community and the society.

WEATHERBLAZER India Pvt Ltd is a pioneer in the weatherproofing applications for the construction industry, with its unique, eco-friendly and pocket friendly end to end solutions with the latest technologies and systems from the world.

With unique applications with enormous promise, adaptability and versatility, we specialize in delivering dependable weatherproofing and waterproofing solutions that offer unparalleled protective benefits suitable for both new construction projects and renovations. Our proficiency lies in providing top-tier products and services known for their unwavering quality and durability, consistently surpassing customer expectations in the ever-evolving construction landscape. We provide complete solutions with professional systems for waterproofing/weatherproofing along with the material and the application under one roof, which enables us to take the complete responsibility of the project.

All our products/applications are based on the formulations provided and adapted by the best companies from Germany and Europe and all our products adhere to the ASTM standards.

All our products/ applications are based on Green construction and try to put minimal load on the structures and the infrastructure.

In waterproofing, we are especially known for providing the solutions to leakages problems without major breaking/ dismantling in the structures and this is possible because all our products are UV Rays resistant and are made for open to sky applications.

We provide warranties for the whole applications including the material and the workmanship.

INNOVATION:

Innovation is foundational in Weatherblazer, inspiring continuous improvement in materials and methods. By embracing innovation, Weatherblazer stays agile in a changing landscape, delivering cutting-edge solutions that ensure long-lasting protection and client satisfaction.

VERSATILITY:

Versatility is paramount in weatherproofing, ensuring adaptability to diverse climates and client needs. It allows for tailored solutions, embracing innovation and technology while remaining resilient to environmental shifts.

EXCELLENCE:

Excellence is the standard by which we measure every aspect of our work. It drives us to continuously improve, innovate, and deliver exceptional results.

CUSTOMER DELIGHT:

Customer delight is central to Weatherblazer, prioritizing satisfaction through exceptional products & services. It fosters strong client relationships built on trust, communication, and exceeding expectations.

ACCOUNTABILITY

Accountability is a cornerstone in Weatherblazer, instilling a culture of responsibility and reliability among team members. By taking responsibility for their actions and decisions, Weatherblazer teams build trust with clients and stakeholders, fostering long-term partnerships based on reliability.

TEAM WORK:

Teamwork emphasizing collaboration and synergy among customers, stakeholders, Franchisees and employees is integral to Weatherblazer. It promotes efficient execution and problem-solving, maximizing productivity and quality outcomes.

STONEBLAZER[®]

STONEBLAZER applications are specially designed for natural stones with the formulations made up of high quality polymers from Germany. The speciality of the application is that it doesn't block breathing of the stone surface and thus retains the beauty of natural stone without making any changes on the surface unless desired.

BENEFITS :

- Maximum reduction of water uptake
- Permeability to water vapour: breathability
- Resistance to UV light, reduced efflorescence
- NO ALGAE/FUNGUS or other Micro Organism
- Keep substrates dry and dust free
- No change in surface appearance unless desired.
- Long lasting effect, outstanding durability & protection
- Reduced maintenance: cost saving

- **Stoneblazer Natura-** Deep impregnating application without changing the appearance or physical characteristic of the stone surface.
- **Stoneblazer Wet Look-** This application enhances the look and provides a magnificent wet look to it.
- **Stoneblazer Marble & Granite-** Special application meant for marble, granite, travertine etc. to make them weatherproof and stain repellent.
- **Stoneblazer Gloss-** Special application which doesn't change the colour of the stone but provides a little gloss.
- **Stoneblazer Wet Look Gloss-** This is meant for clients who like a little gloss with the details enhancement.

APPLICATION AREAS:

Stone Façade, Stone Floorings, Stone claddings and all stones used in construction.

HEATBLAZER[®]

Innovative heat insulation with waterproofing

A single component universal thermal insulating water resistant structural protective system with an innovation of third generation advanced polymer technology – a linear aliphatic polymer based formulation. It is an advanced chemical technology system which on application forms a waterproof elastomeric seal in the form of monolithic uniform coat that provides protection from ultraviolet & Infra-red rays, ageing and normal weathering. It reflects heat and also does not allow the heat flux transmission. It reduces building maintenance cost as well as saves air conditioning energy.

BENEFITS:

- Resists heat on all surfaces such as RCC, Metallic, Asbestos, GI sheets, Pre-Coated roof sheets and Poly-flex.
- Unique non-conductivity (to heat) property keeps the building warm in cold season and cool in hot season.
- Eco friendly for green building constructions.
- Saves electricity due to lower temperature and load on AC.
- Lightweight-puts less stress on the building.
- Excellent adhesion strength and abrasion resistance
- High reflective - light reflection, value of 92 at 700nm with SRI of 120.
- Roof temperature reduction: up to 20°C in peak summer

APPLICATION AREAS:

Building roof and exterior walls. Industrial structure roofs, walls i.e. concrete slab roof, asbestos sheet roof, tin sheet roof; Hospital building roof and walls. Buses and railway coach roofs. Petrol pump room roofs and petrol storage tanks.

WEATHERBLAZER[®] SI PAINT:

Unique application with an enormous promise of adaptability and versatility. Weatherblazer Si Paint made with Silicone Resin are one of the most advanced and preferred painting systems in developed countries due to many advantages over film forming painting systems.

Unlike the various film-forming coatings such as those based on acrylic or other synthetic resins, building materials that have been treated with Weatherblazer Si Paint retain their vapour permeability.

BENEFITS:

- WATERPROOFNESS
- WATER VAPOR PERMEABLE
- WATER & DUST REPELLENT
- NO ALGAE/FUNGUS
- NO CHIPPING/FLAKING
- RESISTANCE TO UV LIGHT
- TIME SAVING SYSTEM
- KEEPS FAÇADE NEW
- ENVIRONMENTAL FRIENDLY
- ECONOMICAL

BRICKBLAZER/CONCRETEBLAZER[®]:

This application keeps the exposed brick/concrete walls even on the exteriors as new even after years of construction, bringing the dreams of Architects' and Designers' come true who are fond of using exposed bricks/ raw concrete but were restricted due to the high maintenance of the same.

BENEFITS:

- Maximum reduction of water uptake
- NO ALGAE/FUNGUS:- Along with water it repels dirt/dust particles, results in protection of facades against growth of Algae /Fungus (Micro Organism)
- Extensive penetration, adequate resistance to alkalis
- Permeability to water vapour: breathability
- Resistance to UV light, reduced efflorescence
- Long lasting effect, outstanding durability & protection
- Reduced maintenance: cost saving

Brickblazer/Concreteblazer applications are available in following appearances:

Natura

*** Gloss**

*** Wet Look**

*** Wet Look Gloss**

WATERPROOFING:

As a specialised waterproofing service provider, WEATHERBLAZER has been successfully able to establish itself as a niche category player in the field with its innovative, technically advanced keeping in line with the rest of world, eco friendly without putting extra pressure on the resources, long lasting and economical solutions.

SPECIALISED WATERPROOFING SOLUTIONS FOR

- Basements
- Walls
- Podiums
- Swimming Pools & etc.
- Bathrooms
- Terraces
- Terrace Gardens
- Water Tanks

We provide end to end solutions with own material & application and thus take full responsibility of our project.

PRODUCTS:

WATERBLAZER 102-	Special Dual component waterproofing with Polymer modified Mineral Slurries and 200% elongation.
WATERBLAZER PU+-	A single component, water based, UV stable, high solids, elastomeric aliphatic Polyurethane based Weatherproofing & waterproofing coating.
WATERBLAZER TR-	Transparent waterproofing for terraces to retain existing roof with leakages issues.
WATERBLAZER BLK-	A high performance aliphatic elastomeric waterproofing system with 900% elongation, suitable for basements, Terrace gardens, Swimming pools etc.
WALLBLAZER CLEAR-	Specialised waterproofing application for walls.
WALLBLAZER ULTRA-	High performance protective elastomeric coating for walls.
DAMPBLAZER-	A special UV resistant, fiber reinforced white coating for terraces & walls.
JOINTBLAZER TAPES-	Range of special joint tapes for waterproofing of any kind of joints.
WATERBLAZER IWL-	Liquid Integral Waterproofing Compound for Concrete & Plaster.
WATERBLAZER IWP-	Integral waterproofing powder additive for concrete and mortar.
CRETEBLAZER ACRL-	Quality Acrylic Polymer for waterproofing Coating/Repairing.
CRACKBLAZER PASTE-	Crack Filler for Interior & Exterior Cracks.

Exclusive Solutions for special problems:

There are some issues which require expertise, experience and latest technologies to deal with them. When anything else doesn't work for any such issue, weatherblazer team is just a call away. Few such issues are:

1. Seepage from Vertical walls: No grey coating, no deformation of your exteriors.
2. Rising dampness: We don't hide the problem behind some coating, rather provide 100% solution.
3. Seepage from Joints: Be it constructions joints, profile sheet joints or and shade joint, we give guaranteed solutions with our range of JOINTBLAZER TAPES.
4. Basement leakages: We provide fool proof solutions to basements leakage of any severity, even when there is no possibility to work from outside.

ELEVATION:

- Stoneblazer
- Weatherblazer Paint
- Heatblazer
- Brickblazer/Concreteblazer
- Wallblazer Clear
- Wallblazer Ultra

SPECIALISED SOLUTIONS:

- Seepage from Vertical walls
- Rising Dampness
- Seepage from Joints
- Basement leakages

REPAIRS RESTORATION RENNOVATION:

- Exterior Restoration And Renovation
- Flooring repairing and restoration
- Structure strengthening
- Stone Strengthening & Restoration

TERRACE:

- Waterblazer products
- Heatblazer
- Dampblazer

WATERPROOFING SERVICES:

- Basements
- Underground/Overhead tanks
- Bathrooms & Balconies
- Terraces & Terrace Gardens
- Swimming Pools
- Podiums

FEW OF OUR ESTEEMED CLIENTS: →

- Haldiram's
- Godrej Anandam
- Pix transmission
- Plasto
- Nitika Pharma butibori
- Railways constructions
- Solar Industries
- Jain temples across India
- Confidence Petroleum
- More than 100 Architects in Nagpur
